Discover the Extreme difference.

Whether you are building or renovating, selecting quality windows and doors for your home is a very important decision. Choosing long-lasting, low-maintenance Extreme windows and doors, is a decision you will be happy with for a lifetime.

With our region's rugged climate and energy-conscious consumers, we specialize in making only high-quality windows and doors for Atlantic Canada and back it up with an industry leading warranty program.

Our Sales, Service, and Technical Support teams combined with our dedicated and loyal production staff are committed to quality service and manufacturing excellence.

Our promise is to use leading technologies to produce top quality products. We partner with the region's best window & door specialists to deliver these top of the line products. Enhancing the comfort, value, and enjoyment of your home.

Quality workmanship goes into every unit we produce.
We guarantee it. For life.

Commitment

At Extreme, we appreciate and understand that in today's marketplace, value, quality, and service are simply expected.

To stand out from our competition we realize that we have to deliver dreams. Our team of professionals are driven by imagination and skill that creates excitement and crafts magic into every product we produce.

Our excellence has made us one of Atlantic Canada's fastest growing companies. Our promises is to produce remarkable performance, versatility, and charm for your homes distinctive style.

Single Hung

Single Hung

Heritage Series

For the widest selection of styles with the most options in exterior and interior trim, choose the Heritage Series from Extreme. Available in White or Tan extrusion colours, the Heritage Series lets you “dress” your window installation with the appropriate brickmolds and jamb extensions and blend perfectly with any architectural style.

Single Hung 4200

- Top sash is fixed for increased weather tightnes
- Bottom sash opens and tilts in for easy cleaning
- Efficient cam locking system for security and a weathe -tight seal
- 3 1/4" PVC frame adds strength and durability
- Triple weatherstrip system
- Insert or brickmold options available
- See page 24 for options

Premium Series

For maximum value and energy efficienc , choose the Premium Series. These windows are similar to our Heritage Series with 1 1/2" brickmold and combination drywall/wood return integrated right into the extrusion at the factory. The resulting continuous frame construction is more structurally sound and weather-tight. The brickmold has a nailing fin and can be converted into a siding return.

Single Hung 4256 + 4267

- 4256 Available in 3 1/4" depths
- 4267 Available in 4 1/2" depths
- Top sash is fixed for increased weather tightnes
- Bottom sash opens and tilts in for easy cleaning
- Efficient cam locking system for security and a weather tight seal
- Integrated 1 1/2" brickmold with nailing fin (converts to accept siding)
- Integrated combination 1/2" drywall / 3/4" wood return
- Triple weather-strip system

Save **ENERGY** Save **MONEY**

With our 4 1/2" integrated frame, your window will sit deeper into the wall creating a warmer window.

- ✓ More vinyl giving you a stronger window
- ✓ *Seamless, one piece frame for maximum weather tightness*

Advantage Series

Built for developers and homeowners across Atlantic Canada. The Advantage Series is setting a new standard in efficiency, superior manufacturing advantage technology, and affordability.

If you're looking for the latest innovation in design and construction choose our Advantage Series window.

Single Hung 4245

- Available in 3 1/4" depths
- Top sash is fixed for increased weather tightnes
- Bottom sash opens and tilts in for easy cleaning
- Efficient cam locking system for security and weather-tight seal
- Integrated 1 1/2" brickmold with nailing fin (converts to accept siding)
- Integrated combination 1/2" drywall / 3/4" wood return
- Triple weatherstrip system
- See page 24 for options

- Integrated 1 1/2" brickmold with nailing fin
- Integrated combination 1/2" drywall / 3/4" wood return
- Triple weatherstrip system

Double Hung & Slider

Designer Series

If you dream it, we will build it.

Extreme Window and Entrance Systems' range of custom options for your windows lets you bring your home to life. Virtually any shape, size, or combination is available as either free-standing window treatments or in a supporting role with our Heritage windows.

We all enjoy our homes differently. Therefore there is no better way to make your home shine with a thoughtful collaboration with our window experts to help make your dream come true.

Our Energy Saving Difference

Low-E Glass allows you to be warmer in the winter and cooler in the summer – saving on heating and air conditioning along the way. Low-E Glass is a series of virtually invisible layers of metallic coating inside the sealed unit that increases the insulating value of a double-glazed window. Low-E will also reduce the harmful effects of UV rays on your interior fabrics and finishes by up to 55%

Argon Gas is a completely safe, naturally inert gas that can be pumped into the air space of the thermal pane. The lower thermal conduction and convection rates of Argon further increase the window insulating values. Include Argon Gas in combination with Low-E Glass for maximum benefit. Learn more about our energy ratings by visiting www.extremedoors.ca.

Good for your savings. Good for the planet.

CANCERTO
THE ECO
WINDOW™

Did you know?

The King penguins live in the southern hemisphere and spend up to 70% of their time at sea, resting on icebergs or drifting blocks of ice.

Experts estimate that if the temperature of our planet rises but just 2 degrees it could cause the extinction of 50% - 75% of the population of The King penguins.

Did you also know that by changing your windows to Extreme Energy Star qualified eco-windows, you can save up to 12% on your heating bill and contribute in reducing global warming.

Concerto windows made by Extreme Window & Entrance Systems are solid, elegant, and provide great savings for your heating bills.

Calculate your savings online. www.extremewd.com

Window Options...

maximum value with energy efficiency & options

Window Series add-on components can suit any home.

- ① 1 1/2" J-brickmold

Fiberglass Entrances Systems

The beauty and texture of wood in long-lasting fiberglass

Give your home incredible warmth and appeal with these amazing wood-textured fiberglass entrance systems. Paintable and stainable, these doors provide years of low-maintenance satisfaction. Notable features include:

- Deep wood-grain texture
- High-performance fiberglass facings
- Polyurethane core; engineered stiles
- Rot resistant bottom rail

Ask about our glass insert options.

We have a variety of glass insert options including silkscreen image, leaded lites with decorative glass, and even internal mini blinds.

Steel Entrance Systems

Extreme entrance systems come in a wide variety of styles and sizes and can be combined with Sidelites, Transoms, and other products to make beautiful feature installations. They may be very beautiful, but deep down they are doing very important jobs – protecting you and your family while saving your energy dollars. Constructed of the highest-quality galvanized steel, they offer superior durability and security as well as weather and rust resistance. Magnetic weatherstripping seals keep out wind, rain, and dust. Foamed-in-place polyurethane insulation ensures comfort and energy savings.

- High-quality CFC-11-free polyurethane core system that has been designed, engineered, and tested to provide superior insulation (R-16) and structural strength
- 1 1/4" stiles made of kiln-dried, finger-jointed wood to provide full length thermal barrier between interior and exterior
- Seamless vinyl cladding over finger joint pine prevents condensation (interior cladding available)
- Ball bearing hinges
- 24-gauge, G-60, hot-dipped galvanized steel for maximum rust protection
- 1" to 4" Brickmold available.
- Adjustable door sweep

Door Size	Single Door Dimensions	Door + 1 Sidelite	Door + 2 Sidelites
32" x 80"	33 3/8" x 82 1/2"	49 1/8" x 82 1/2"	64 3/4" x 82 1/2"
34" x 80"	35 3/8" x 82 1/2"	51 1/8" x 82 1/2"	66 3/4" x 82 1/2"
36" x 80"	37 3/8" x 82 1/2"	53 1/8" x 82 1/2"	68 3/4" x 82 1/2"

To calculate RSO, add 1" to the width and height.

Steel & Fiberglass Garden Doors

With all of the modern energy efficiencies and performance features built into them, our Garden Doors provide the perfect opportunity to connect your indoor and outdoor worlds with style. Whatever your choice, you can be sure it's the right one. Each door is made to meet or exceed rigorous Canadian performance standards and is backed by industry-leading performance warranty.

Bring the beauty of the outdoors into your home with these energy-efficient classics. The fixed panel adds strength to the centre post and hosts the sliding screen for days when you just want to let the outdoors in.

- High-quality construction
- Available with a range of grill, decorative glass, and mini-blind options
- Ball Bearing hinges
- Compression and magnetic weather-stripping
- Self-draining sill to ensure superior weather protection

Integra Patio Door
